

Vibration Isolation Tables

- Active pneumatic vibration isolation tables for high resolution microscopy, electrophysiology and laser research applications
- Custom-sized tables on standard price
- IVF tables: specially equipped vibration isolation tables with accessories
- Table-top vibration isolated base platforms for microscopes
- Elastomer-based damping plates
- Quiet Air Compressors

Dual-Superfusion Slice Chamber

- It is not only a new product, but a unique, worldwide patented idea
- Increases the vitality, and lifetime of the cells in the brain slices
- Oxygen and other materials from both sides can freely and more effectively diffuse into the thick slices

Temperature Management in Physiology

- Noise free heating even in a shielded experimental environment. Smooth heating current, like a lead battery
- Optimized for life science applications (0 to 100 C, with 0.1 C resolution)
- Heating pads for surgery of animals
- Temp. controlled brain slice chambers
- Objective heaters and heated stages for microscopes

In-line Solution Heaters

Temperature regulation of the incoming solution to brain slice chambers or living tissue chambers

Contact Information

Headquarters in the United Kingdom:

Supertech Instruments UK Ltd.
25 Durban Road
London
E17 5EA
England

Do you have a special development task? Should you measure or control something special? Do you need a unique experimental setup? Do you need a custom made electronic measuring equipment?

Contact us – Our developer experts and design engineers are ready to help you to solve your special task.

5 years of full warranty for electronics
3 years for precision mechanics
